

## ASK AN EXPERT Services offered by Creative Media Developers

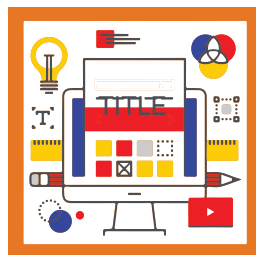

Creative Media Developers can support you with the development of media assets for your online course. We offer specialized consulting, production and post-production expertise. Our goal is to help you present ideas, concepts, processes and other information in a visual and/or auditory way, to increase knowledge retention and enhance student engagement.

### Ways we can help:

- Help identify what you want students to learn from the asset
- Recommend the type of media that will best suit the idea or concept
- Provide expertise on graphic design in the creation of assets
- Help ensure your media assets meet accessibility standards
- Share examples of media assets we have created for use in other courses and university projects
- Consult on different types of media asset creation including infographics, illustrations/graphic design, motion graphics (animated explainer videos), audio recording and post production

infographics

illustrations/graphic design

motion graphics

audio recording

post-production
